GENERAL ENGINEERING · SOFTWARE DEVELOPMENT

joeysngn@gmail.com

(346) 280-1323

College Station, TX

Engineering student who ships production software. I cut a live platform's load times by 97% as an intern, and I build the tools I wish existed. Now bringing that same debug-it-until-it-works instinct to hands-on mechanical work.

## EXPERIENCE

### Software Engineer Intern

Jun – Aug 2026

A+ Computer Science · Cypress, TX

- Cut average login and page-navigation times from ~130s to **4s** by rewriting query paths and restructuring how the site fetched data: a 97% reduction on the platform's most-used flows.
- Built the in-browser **code editor and execution environment** students use to write and run their assignments.
- Redesigned interface elements and **navigation flow** to make the site easier and more pleasant to move through, supporting stronger day-to-day usage across teachers and students.
- Developed database-backed **student progress trackers** giving teachers per-student visibility across their classes.
- Shipped features across the full stack in **SQL, PHP, JavaScript, Python, HTML and CSS**, coordinating with developers on sprint scope and bug triage.

## PROJECTS

### Course Registration Web App

2026 – present

Lead Developer · Independent

- Scrapes the Texas A&M course catalog and generates ranked schedules, solving the filtering problem the university's own registration tools leave to students.
- Supports **soft and hard time blocking**, plus optimization for tight back-to-back days or deliberately spread-out weeks.
- Integrates professor ratings into schedule scoring so results rank by instructor quality, not just time slots.

## TECHNICAL SKILLS

### LANGUAGES

Java, Python, JavaScript, SQL, PHP

### WEB

HTML, CSS, front-end & back-end integration

### PRACTICE

Database design & optimization, performance profiling, web scraping, Agile sprints, debugging

## HANDS-ON

- Prototyping with **Arduino microcontrollers and sensors**; comfortable with hand and power tools.
- Motorsport-driven, and set on applying the software half of my background to **telemetry and data-informed setup decisions**.

## EDUCATION

### Texas A&M University

B.S. General Engineering, first-year (pursuing Mechanical)

Class of 2030

## ACHIEVEMENTS

- **USA Biology Olympiad Semifinalist**, 2026: top ~500 nationally out of roughly 10,000 entrants
- Event Coordinator, High School Computer Science Club
